macOS
Ubuntu 14.04

RAM:

2 GB (4 GB recommended)

Video card:

OpenGL 2.0-friendly (macOS, Ubuntu)
DirectX 9 (Windows)

Hard disk space:

45 Mb

System Requirements

Operating system: Hard disk space:

iOS 8.0; Android 50 Mb
4,0,4

Problems & Solutions

My antivirus blocks the installed file

Update the antivirus installed on your computer. Add the IQ Option client to the exclusions list of your antivirus.

Video driver generates an error (Windows)

If during the installation process or when you run the app a dialog box appears asking to update your video card drivers, it means that your current drivers do not support OpenGL configuration used in the app. In order to solve this problem you need to visit your video card manufacturer's website (using the hyperlinks in the dialog box) and download and install the drivers for your video card. If after performing the above actions the problem persists, it may indicate that your video card does not support OpenGL configuration as required.
